Solar Roofing System

Introduction

A Cleaner Environment and More Sustainable Future. Ensuring a cleaner and more sustainable future for generations to come is priceless. Most people are struggling with paying High Cost of Electricity to Local Electric Utilities. Switch to Solar power solutions is the Smart and Best solution to be more Economical and Environmentally friendly Power Source.

Benefits

Reduces Electricity Bills

Significant Savings

Reliable and Dependable Return of Investment (ROI)

Diverse Applications

Low Maintenance Cost

Technology Development

Can Qualify for Government Incentives and Benefits

Solar Street Lights

Introduction

Solar street lights are independent of the utility grid resulting to lessened operation costs. These means that these are wireless lights and are not connected to your electricity provider. The lights are dependent of the heat energy given off by the sun, storing as much of it throughout the day. Solar street lights require lesser maintenance than conventional street lights.

These have lower chances of overheating.

Benefits

Energy-saving, pollution-reducing, money saving.

No cable-laying work or complicated power facilities needed!

No interdependency weaknesses

No cable costs, no cable theft.

Intelligent control, easy construction and maintenance.

Solar Pumps

Introduction

Private households and farms need stable and consistent water supply, however this can be particularly difficult in areas far off cities where there are no regular city-like water pipe supply systems available but only resources in forms of wells deep in the ground. During hot months and in hot areas the requirement for water is high.

Benefits

Don't Need External Power

Minimum Operating Cost

Easy Maintenance

Can Be Moved

Easy to Install

Efficient

Solar Kits

Introduction

These systems use solar panels to harness the sun's energy and then store that energy in a portable storage system for later use. Build the power system that provides Home lighting, Outdoor Lighting, Enjoy music FM/MP3, and Phone Charging from generator or Solar Panel.

Benefits

No fumes

No noise

Safe to use

Low maintenance costs, as there are no moving parts

Built-in FM Radio with memory function LCD display

MP3 Music player play music from SD, U-disk, MP3, etc

Power pack to charge your phone wherever you like.

Time and Attendance Management

Introduction

One of our top products and highly requested by HRD PERSONNELS, BUSINESS & COMPANY OWNERS, and AGENCIES in the country. It captures the unique biological/physical features such as your hand or fingerprint, RFID Card Access, and sometimes even your Facial Recognition as a record to identity verification and allows you to perform something that you are authorized to do. Most especially to monitor the Time and Attendance of Employees.

Benefits

Eliminates buddy time punching

No repetitive consumable costs

Trustworthy Data

Accurate Payroll records

Automated Workplace Rules

Increased Productivity

Improves Employee Accountability

Door Access Control System

Introduction

An Access Control System will allow the business to limit access to the room to only the employees deemed necessary. Holder's Total Security realizes that not every business needs an Access Control System

Benefits

Know Who's Coming and Going

No Undetected Strangers

Reduce Chaos of After-hour Shifts

Secure Sensitive Information

Increase Safety

Reduce Theft and Accidents

Control Multiple Access Across Multiple Properties

Closed Circuit TeleVision

Introduction

CCTV can provide a whole host of advantages within the building in which it is installed, along with its contents and any workers or residents.

Benefits

- Crime deterrent
- Monitors activities
- Collect evidence
- Decision Making
- Keep records

Uninterruptible Power Supply

Introduction

Lights go out, computer screens darken, machinery stops and productivity screeches to a halt as you immediately worry about lives, injury, safety and damage. You also don't want to be one of the businesses that collectively lose million annually due to power failure.

These facts underscore the need for a failsafe backup plan.

Benefits

Protect against power interruptions

Provide adequate power during short-term interruptions and "ride-through" time to convert to backup supply

Refine the quality of the power as it reaches your building, office and equipment

Include a backup source for long-term outages, such as generators
